1. The large commercial airfield under construction south of Leningrad had a concrete runway, 1,000x60 meters, which was being extended to the west by about 1,500 meters. about 3,000 meters of the runway was completed by December 1949. This P., who had also seen some of the construction plans, said that it was intended to build a runway system in the shape of a triangle, with each of the three sides 3 km long.
